

# Protective Cover

# GEM

The RSB-100 cover protects access control readers against weathering and vandalism. RSB-100 has a patent pending for approval. When using the RSB-100 with keypads, lift the cover to enter PIN codes.

When using with proximity readers, simply scan the card without lifting the cover. Snake eye security screw can be used to lock the protective cover and protects the readers from vandalism.

174.5 H x 104 W x 60 D (mm)

## RSB-100

Applicable models are as followed:

DG-800+  
DG-700
