Electromagnetic Lock Installation Instruction (Waterproof Series)

Optional Bracket

Brackets installation are according to door swing direction and door frame type, e.g. narrow frame door, frameless glass door, inswing door, etc.

Regular Installation (outswing door)

L-bracket for narrow frames (optional)

U-bracket for frameless glass doors (optional)

LZ-bracket for inswing doors (optional)

Regular Installation

Fold the mounting template 90°

Place the tamplate to the proper position of the door and frame .Mark the hole positions of the template to the door and frame

Drill the holes according to the marks.

Please install the armature plate as illustrated here. (Dimensions of the holes are depending on the door types as illustrated below.)

Drill a Ø8mm hole through door, on closing side enlarge to Ø12.7mm by a sexnut blot on the opening side. Drill a Ø6.8mm hole and tap on closing side a M8x12.5thread.

Drill a Ø8mm hole thrugh door on closing side enlarge to Ø 12.7mm, by a sexnut blot on the opening side. The depth is 36mm.

Recommendation:

For Micro EM-locks (300 LBS), maximum thickness of door is 44 mm.

For Mini EM-locks (600 LBS), maximum thickness of door is 50 mm.

For Midi EM-locks (800 LBS), maximum thickness of door is 48 mm.

For Maxi EM-locks (1200 LBS), maximum thickness of door is 46 mm.

Fixing screw

Use the screws to permanently mount the mounting plate, then mount the magnet with the fixing screws provided.

Connect the power and test the unit. Insert the anti-tamper caps into the holes of mounting screws.

Butt Splice(IDC) Connector

Using crimper or pliers and pressing the header of connector down to even position.

LZ or Z bracket for inswing doors

Find a mounting position on the door frame for the L bracket. Make sure that the door is still closeable.

Use the fixing bolts to tighten the electromagnetic lock on L bracket. (For face mount , the magnetic lock can be mounted directly on the door frame).

Assemble the Z bracket, and make sure that the Z bracket is adjustable.

Insert the guide pins into the armature plate.

Fasten the armature plate to the Z bracket (Must add rubber washer).

Close the door and connect the power.

After the maglock attracts the armature adjust plate, the Z bracket to fit the door.

Fasten the Z bracket to the door.

Connecting Diagram

Wire Leads (Power input is polarity free)	Power Input	Bond sensor output	Digram	Bond sensor output
2 Wire Leads Single voltage (Power inputis polarity free)	12VDC or 24VDC	_	Parallel Connection:12VDC Series Connection:24VDC Control Device Control Device N.C contact or Access Relay N.C contact or Access Relay White Power Black Supply
