

Three-Door Interlocking Relay Module

GEM

ILM-300 is an interlocking relay module for a three-door egress control.

The module is designed with a jumper to easily select between fail-safe and fail-secure electric locks. The control module integrates three electrified door locks alternately from changeover relays to allow egress from only one of the door at any given time.

Feature

- ✓ Dimension: 73(L) x 63(W) mm
- ✓ Suitable for both Fail-Safe and Fail-Secure Electric Locks
- ✓ Compatible with European Single-Gang Box
- ✓ Power Input: 12VDC or 24VDC
