

# Electromechanical Push Bar

# GEM

## PBH-100 Series

PBH-100 series electromechanical push bars are electrified exit devices designed to work with access control as means of locking mechanism. On exit, simply depress the push bar to open the door. It is recommended to pair with key cylinders or access control devices on the exterior.

PBH-100MLD models feature an bi-colour LED indicator, allowing the exit to be quickly identified in the dark.
